GLASS-LITE™

Light Weight / Short Strand Fiberglass Reinforced Filler

GLASS-LITE™ is the first **light weight**, short strand fiber, reinforced body filler to hit the market. This unique reinforced filler offers all of the benefits of typical short strand fiber, reinforced filler, while providing extremely easy sanding and easy spreading. GLASS-LITE™ sands to a finish-quality, eliminating the need to apply a light weight body filler. Rustproof and waterproof, GLASS-LITE™ can be used for a variety of repairs. Whether you are repairing rust or weld areas and bond lines, GLASS-LITE™ mixes and applies smoothly and sands easily to contour. GLASS-LITE™ can be applied to bare steel, galvanized steel, aluminum, fiberglass, SMC, plaster, concrete, masonry and wood.

USES

- Ideal for non-structural composite repairs
- Filling holes and cracks in metal, fiberglass and wood
- Rust repair
- Cosmetic body filler applications
- Weld seams
- Panel bond seams
- Areas prone to excessive moisture

FEATURES

- Light weight
- Creamy formula
- Sands to a finishable quality
- ZNX-7™

ADVANTAGES

- Easily sands to contour
- Remove 50% more material than the Leading Competitor in the same time!
- Easy spreading
- Provides a smooth surface profile, smoother than any reinforced filler on the market
- Eliminate the need for applying a conventional filler
- Improves adhesion to galvanized steel, aluminum and metal
- Enhances corrosion protection

BENEFITS

- Reduce Labor
- Reduce sandpaper, materials and costs
- Reduce sanding time to remove texture
- Improve overall productivity
- Reduce time and material costs
- Increase productivity and profits
- Reduce the chance of cracking due to poor adhesion
- Adds integrity to the repair
